# Zagrożenia układu mięśniowo-szkieletowego w środowisku pracy

## Zestawienie obcojęzycznych źródeł informacji

---

Zestawienie obejmuje wybrane rezultaty wyszukiwań tematycznych z lat 2020-2018, dotyczących zagrożeń mięśniowo-szkieletowych w środowisku pracy, prowadzonych w międzynarodowych bazach elektronicznych, w których są udostępniane zasoby informacyjne w ramach tzw. licencji krajowych (Wirtualna Biblioteka Nauki – WBN), oraz w bazach subskrybowanych przez Instytut (ProQuest, IEEE/IET, OSH UPDATE + FIREINF), a także w innych źródłach dostępnych w Internecie.

Zaprezentowane w zestawieniu zasoby można znaleźć w CIOP-PIB (m.in. w Czytelni Instytutu, dostęp ze strony internetowej Biblioteki: [www.ciop.pl/biblioteka](http://www.ciop.pl/biblioteka)), a także w wielu jednostkach naukowych, badawczo-rozwojowych, korzystających z dostępu do światowych zasobów wiedzy. W trakcie wyszukiwań korzystano m.in. z multi-wyszukiwarki zasobów naukowych, za pomocą której można znaleźć większość zasobów dostępnych w Centralnym Instytucie Ochrony Pracy – Państwowym Instytucie Badawczym.

Wyrażenia wyszukiwawcze wiązały się z zagrożeniami układu mięśniowo-szkieletowego, występującymi w środowisku pracy. Były to m.in.: *work-related musculoskeletal disorders*, WRMSDs, MSDs, musculoskeletal pain AND work i back injuries. Wyniki wyszukiwań zawężano do wiarygodnych, czyli recenzowanych zasobów informacyjnych, obejmujących przede wszystkim artykuły z obcojęzycznych czasopism naukowych.

Do zestawienia dołączono także wybrane pozycje z lat -2017, zawierające informacje dotyczące zagrożeń układu mięśniowo-szkieletowego w miejscu pracy.

Opracowano i wydano w ramach realizacji V etapu programu wieloletniego „Poprawa bezpieczeństwa i warunków pracy” (2020-2022) finansowanego w zakresie zadań służb państwowych przez Ministerstwo Rodziny, Pracy i Polityki Społecznej.

Koordynator programu:  
Centralny Instytut Ochrony Pracy – Państwowy Instytut Badawczy.
